

power what's next

The energy industry boomed in 1970. From oil, gas, oil shale, and coal to solar, Colorado was at the epicenter of energy. And Dufford & Brown was there.

Today, Colorado is once again at the forefront of a new energy boom. As Colorado – and the nation – look for new ways to power the future, Dufford & Brown will be there.

From traditional resources to alternative energy, we're helping our clients address regulatory requirements, manage strategic acquisitions and divestitures, and find the complicated balance between environmental concerns and energy production.

From oil, gas, and coal to solar and wind, together with our clients, we're helping build Colorado's energy future.

Dufford & Brown celebrates 50 years – Then. Now. Next.
